Australian Standard<sup>®</sup>

---

**Floor coverings—Resilient sheet  
and tiles—Laying and  
maintenance practices**

---

This Australian standard was prepared by Committee PL/15, PVC Flooring. It was approved on behalf of the Council of the Standards Association of Australia on 16 April 1985 and published on 12 July 1985.

---

The following interests are represented on Committee PL/15:

Adhesives and Sealants Manufacturers' Association  
Australian Particleboard Manufacturers' Association  
Building Owners and Managers Association of Australia Limited  
Confederation of Australian Industry  
CSIRO, Division of Building Research  
Department of Public Works, N.S.W.  
Department of Housing and Construction  
Plastics Institute of Australia Incorporated  
Plywood Association of Australia Limited  
Public Works Department, Vic.  
Railways of Australia Committee  
Royal Australian Institute of Architects, Victorian Chapter

---

**Review of Australian Standards.** To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

---

*This Standard was issued in draft form for comment as DR 83102.*

## PREFACE

This standard was prepared by the Association's Committee on PVC Flooring, under the direction of the Plastics Standards Board, as a proposed new edition of AS 1884—1976.

Whilst appropriate standard specifications may assure satisfactory quality of a floor covering, unsatisfactory service may still occur through faulty laying techniques or misunderstanding of the various factors which this standard is designed to counter. The standard sets out precautions to be taken before laying the floor covering, preparation and treatment of various types of subfloor, conditioning requirements, and the procedure to be used in the application of the floor covering to the subfloor.

The standard is presented in a form intended to make it suitable for use by architects and others as a means of specifying how a floor covering should be laid. In addition Appendix A covers three methods of test for determining the dryness of concrete subfloors.

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

**FLOOR COVERINGS—RESILIENT SHEET AND TILES—  
LAYING AND MAINTENANCE PRACTICES**

(Revision of AS 1884-1976)

## SECTION 1. SCOPE AND GENERAL

**1.1 SCOPE.** This standard sets out recommendations for the laying, fixing and maintenance of resilient sheet and tile floor coverings in all forms including flexible PVC, semi-rigid PVC, linoleum, cork and rubber. It also applies to self-adhesive tiles.

It gives details of the work necessary to prepare subfloor surfaces, together with procedures that should be adopted for laying the floor covering.

It does not apply to the laying of synthetic or natural fibre carpet or carpet tiles or backed resilient floor coverings.

**1.2 REFERENCED DOCUMENTS.** The following documents are referred to in this standard:

AS 1080	Methods of Test for Timber Part 1—Moisture Content
AS 1510	Code of Practice for Control of Concrete Surfaces Part 1—Formwork
AS 1684	SAA Timber Framing Code
AS 1859	Flat Pressed Particleboard
AS 1860	Code of Practice for Installation of Particleboard Flooring
AS 2098	Methods of Test for Veneer and Plywood 2098.1—Moisture Content of Veneer and Plywood
AS 2269	Structural Plywood
AS 2458	Hardboard

and Exterior Use†

**1.3 DEFINITIONS.** For the purpose of this standard, the following definitions apply:

**1.3.1 Subfloor**—the surface on which the floor covering or the underlay is to be laid (see Fig. 1.1).

**1.3.2 Screed topping**—a bed of concrete with a small maximum sized aggregate or other suitable material applied to a subfloor and brought to a defined level (see Fig. 1.1).

**1.3.3 Underlay.** A layer of sheet material or in situ filling on the subfloor or the screed topping to provide a smooth level surface to receive the floor covering. Underlay may be in the form of sheet underlay or trowelled underlay (see Fig. 1.1).

**1.3.4 Purchaser**—the principal to the contract or the person authorized by the principal to superintend the work on his behalf.

**1.3.5 Floor-laying contractor**—the firm or person authorized by the purchaser to carry out any necessary preparation of the subfloor surface and the laying of the floor covering.
