Cast grey and ductile iron non-pressure pipes and fittings

This Australian Standard was prepared by Committee WS/5, Cast Iron Pipes and Fittings (Non-pressure Type). It was approved on behalf of the Council of Standards Australia on 28 March 1994 and published on 14 June 1994.

The following interests are represented on Committee WS/5:

A.C.T. Electricity and Water

Australian Chamber of Commerce and Industry

Brisbane City Council

Engineering and Water Supply Department, S.A.

Melbourne Water

Metal Trades Industry Association of Australia

Public Works Department, N.S.W.

Rural Water Corporation, Vic.

Water Authority of Western Australia

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

Australian Standard®

Cast grey and ductile iron non-pressure pipes and fittings

First published as AS A88—1959. Revised and redesignated in part as AS A88.1—1970 and AS A88.2—1970. AS A88.1—1970 and AS A88.2—1970 revised, amalgamated and redesignated AS 1631—1974. Second edition 1994. AS 1631—1994 2

PREFACE

This Standard was prepared by the Standards Australia Committee on Cast Iron Pipes and Fittings (Non-pressure Type) to supersede AS 1631—1974.

The pipes and fittings covered by this Standard are intended primarily for use in sanitary plumbing, including sewerage, drainage and ventilating systems operating under negligible internal working pressure, except when accidental surcharge occurs.

This edition differs from the 1974 edition in the following respects:

- (a) Ductile iron has been included as an acceptable material for these products. However, it may be necessary to provide suitable protective coating internally and externally to ductile iron pipes and fittings in order that an acceptable working life can be assured. The Section on coating and lining has been expanded to cover this requirement.
- (b) The requirements concerning manufacture and finish have been modified to correspond with the approach of AS 2280, *Ductile iron pressure pipes and fittings*.
- (c) Minimum pressures and durations have been introduced to the hydrostatic test requirements.
- (d) Where elastomers are chosen as a material for seating rings and gaskets, this edition requires that reference be made to AS 1646, *Elastomeric seals for waterworks purposes*.
- (e) The requirements concerning test openings and inspection openings have been modified to correspond with the approach of other Standards for non-pressure pipes and fittings.
- (f) Requirements for prefabricated fittings, such as reflux valves and saddles, have been included within the Standard.
- (g) The text has been editorially updated to comply with current Standards Australia style.

The terms 'normative' and 'informative' have been used in this Standard to define the application of the appendix to which they apply. A 'normative' appendix is an integral part of a Standard, whereas an 'informative' appendix is only for information and guidance.

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

STANDARDS AUSTRALIA

Australian Standard

Cast grey and ductile iron non-pressure pipes and fittings

1 SCOPE This Standard specifies requirements for cast grey iron (flake graphite) and ductile iron non-pressure pipes and fittings up to nominal size DN 300, and intended to be used where the internal working pressure is negligible.

Where resistance to internal pressure is of prime importance, reference should be made to AS 2280, AS 2544 and AS 1724.

NOTE: Guidelines on information that should be provided by the purchaser or agreed upon at the time of enquiry or order are given in Appendix A. Typical designs of fittings are given in Appendix B.

2 REFERENCED DOCUMENTS The following documents are referred to in this Standard:

AS	
1199	Sampling procedures and tables for inspection by attributes
1349	Bourdon tube pressure and vacuum gauges
1399	Guide to AS 1199—Sampling procedures and tables for inspection by attributes
1646	Elastomeric seals for waterworks purposes
1650	Hot-dipped galvanized coatings on ferrous articles
1722 1722.2	Pipe threads of Whitworth form Part 2: Fastening pipe threads
1724	Cast grey iron pressure pipes and fittings with bolted gland joints
1789	Electroplated coatings—Zinc on iron or steel
1790	Electroplated coatings—Cadmium on iron or steel
1830	Iron castings—Grey cast iron
1831	Iron castings—Spheroidal or nodular graphite cast iron
2280	Ductile iron pressure pipes and fittings
2345	Dezincification resistance of copper alloys
2544	Grey iron pressure pipes and fittings
2758 2758.1	Aggregates and rock for engineering purposes Part 1: Concrete aggregates
3500 3500.0	National Plumbing and Drainage Code Part 0: Glossary of terms
3501	Parallel screw threads of Whitworth form (BSW and BSF) and associated gauges and gauging practice
3855*	Suitability of plumbing products for contact with potable water

^{*} First published as an Interim Standard.
